

Jadavpur University/ Bachelor of Information Technology

4th Year 1st Semester

Distributed Computing

Class Test 2

Full marks:30/Time 1 hr.

1. (CO4) What are the assumptions of Himalayan and Singhal deadlock detection algorithm. Explain the algorithm in brief. Discuss on how termination is guaranteed. (5+5+5=15)
2. (CO3) Explain different types of Asynchronous Shared Memory in brief. Describe a mutual exclusion algorithm. How progress is assured in asynchronous distributed system. (5+5+5=15)
